# WHY THIBO

## 1 CUSTOM PRODUCTS FROM OUR OWN FACTORY

All Thibo products are designed, tested and manufactured for daily and intensive use. Need a specific size, a different colour or a standard item? We make it all. Produced in our factory in Beek en Donk.

In addition to being a producer, Thibo is also a wholesaler. When it comes to permanent and temporary fencing and access systems, we've got everything you'll need.

## 2 SERVICE AND DELIVERY RELIABILITY

Thanks to our short lead times and large volumes, we guarantee correct and fast delivery, often directly from stock. Our regular carriers have been selected for consistently delivering as agreed. This assures high delivery reliability and excellent service for you.

## 3 SAFETY AND QUALITY

Safe quality products, with a long service life. That's what you can expect from Thibo. To ensure this, we produce everything according to strict European guidelines and test every product extensively. So you are guaranteed top quality.

## 4 A MAXIMUM SERVICE LIFE

Qualitative, safe, user-friendly and reliable. That's the standard our products live up to. Exactly the right type of fence for every situation.

# TEMPORARY FENCING

## RANGE

Mobile fences bought with ease directly from the manufacturer! As the leading specialist in temporary fencing, Thibo offers exactly the right type of mobile fence for every situation and budget. Thanks to our many years of experience in the field of steel and wire products, we have put together a range of top-grade mobile fencing suitable for any project.

At our site in Beek en Donk, we manufacture mobile fences and related products ourselves. As a result, most fences are available directly from stock and we are able to stay on top of quality control. So you are guaranteed to get the best fences for your project quickly.

## CUSTOM PRODUCTS

Looking for something special that is not in our standard range? Our engineers are happy to work with you to develop a robust bespoke product. This is then produced using our modern machinery.

+ Additional corner reinforcement with machine-welded supports. Possible with pre-galvanised and post-galvanised mobile fencing.

+ A vertical centre tube for an extra sturdy mobile fence. Also suitable for mobile fence curtains and nets.

+ Anti-climb protection through High Security mesh.

No welds due to rounded corners. A durable mobile-fence corner. +

+ An ultra-light mobile fence due to the standard mobile fence mesh.

+ Additional corner reinforcement thanks to welded-on corners. A mobile fence for multiple uses.

+ A safe building site with City Fence panels prevents distractions from traffic and makes unwanted attachment of bicycles impossible.

+ A horizontal centre tube for an extra sturdy mobile fence. Also suitable for mobile fence curtains and nets.

## EXTENSIVE STANDARDISED RANGE

Our modern machinery and optimised processes mean we offer an extensive standardised product range, with various options for customisation.

### A MOBILE FENCE FOR EVERY SITUATION

Multiple types, meshes and reinforcements possible. A suitable mobile fence for every situation. Choose from the many standard models!

**EXCELLENT PRICE-QUALITY RATIO**

**PRODUCED IN OUR OWN FACTORY**

**WITH MAXIMUM SERVICE LIFE**

# PRE-GALVANISED MOBILE FENCING

Pre-galvanised mobile fences are produced from pre-galvanised wire and tubes. The fences are carefully fabricated for optimum quality and immediate use on building sites. Or resell them to your customers, for guaranteed satisfaction.

Our anti-climb/high-security fences are also ideal for events. Moreover, they are lightweight, making it possible to supply large volumes and offer very competitive prices.

## UNIQUE A4-WELD MOBILE FENCES

Our A4-weld mobile fences have unique machine-welded corner supports. This construction offers ultimate durability and strength on site. Our machine-welded corner supports are even applied to pre-galvanised mobile fencing, giving you top quality at an affordable price.

# POST-GALVANISED MOBILE FENCES

The tubes and wire of post-galvanised mobile fences are produced from bare material. Each mobile fence is carefully assembled and then hot-dip galvanised into a top-quality product.

Hot-dip galvanised mobile fences are heavy and therefore stable and have a long service life. They are perfectly suited for various rental purposes and projects with very high demands. Whether you need a mobile fence for a temporary building site or for a long-term project, enjoy maximum longevity with these sturdy and robust post-galvanised mobile fences.

Thanks to our streamlined production process, we offer a highly competitive standard range at very competitive prices.

# ACCESSORIES

Turn your fence into a solid and safe partition with Thibo's mobile-fence accessories. Here you will find all the supplies you need to achieve the desired end result. The right accessories for every mobile or site fence. Thibo's mobile fence accessories are of the highest quality and extensively tested in the field. So you are assured of secure fencing around your site.

Are you looking for a particular accessory that is not pictured? No worries! Our range includes many more accessories.

For more accessories and information, visit [www.thibo.nl](http://www.thibo.nl). Log in to My Thibo with your personal account.

# CRUSH BARRIERS

Very strong, easy to connect and competitively priced. These are the three main features of Thibo's crush barriers. With this type of fence, you are super flexible in creating pedestrian routes.

The crush barriers have the following features:

- A size of approx. 250 x 110 cm
- Fully hot-dip galvanised for a long service life
- A hook/eye connection to link the fences quickly
- Easy to transport with our handy crush barrier rack

Crush barriers have a lot to put up with. From one project to another, truck in and truck out. No worries! Thibo's steel crush barriers can really take a beating. Hot-dip galvanised steel also provides an extra protective layer, so the fence will last a long time.

# TRANSPORT

Thibo has a wide range of crush-barrier or mobile-fencing transport racks. Transport racks allow you to easily transport and store mobile fences or crush barriers.

The transport racks are set up to take the maximum capacity of fences and/or accessories. This ensures very orderly storage during transport and on site. The transport racks are fitted with forklift slots that make moving with a forklift easy. This saves a lot of work and back pain!

## BENEFITS OF TRANSPORT RACKS

- Easy to transport
- Easy to store
- Speeds up the setup process
- Keeps materials in good condition

## MOBILE-FENCING TRANSPORT

# ACCESS

When you deploy fencing to secure a project, it is obviously useful to get onto the site easily and quickly, for authorised people at least.

Thibo has several gates and accessories that provide this access. With the various gate accessories available, the gate is integrated into the fence in no time.

In addition to the various pedestrian gate versions, Thibo also has a handy guide set to turn a mobile fence into a sliding gate and offers the ultimate in convenient access for large vehicles with the fully 'Plug & Play' Portára automated sliding gate!

# GATES

For easy access to your site, it is useful to install a pedestrian gate in your fencing or turn one or more construction fences into a wide entrance gate. Various hinge options can be used for this, and Thibo's mobile fence wheel is a godsend for smooth opening and closing motion.

For more gate accessories, go to [www.thibo.nl](http://www.thibo.nl). Log in to My Thibo using your personal account.

Double Vesta - automatically or manually operated

# PORTÁRA - MOBILE FENCE SLIDING GATE

## PLUG & PLAY

The Portára aluminium sliding gate is very well suited as a temporary gate for your building site or other grounds. The Portára consists of a high-quality aluminium gate with a sturdy wire panel and can be installed either left- or right-handed. The sliding gate fits seamlessly with our mobile fencing, but can also be used with bar mesh fencing or wire mesh fencing.

This sliding gate comes fully Plug & Play ready. Thanks to the prefabricated bases with forklift cut-outs, the gate is set up in no time and is ready for immediate use. Is the sliding gate on your current project no longer needed? Dismantling is also easy. This makes the Portára multi-purpose for multiple projects.

The Portára has a standard size of 5, 6 or approx. 7 metres.

Automatically or manually operated

**FOR DIRECT USE ON BUILDING  
SITES OR OTHER AREAS**
